

Note to users

About these slides

- Slides are designed to help users across Oregon present and share county population and benchmark data:
 - Population by county, age, race/ethnicity; and population change
 - County data (for 31 of 91 benchmarks) as of August 2007
 - See <http://benchmarks.oregon.gov>
- Sample interpretations are given in the notes panel of all data slides (“Normal” view). The 2007 slideshows will be the **last** where sample interpretations are included.

Interpreting the data and using the show

- Users are encouraged to use sample interpretations as a guide when presenting.
- Details regarding the data are offered online through the benchmark report generator (see above url); refer to module 3 for a complete description of the data.
- Each slide compares your county’s data with the statewide average and either a rural or urban county average. (Urban counties are: Benton, Clackamas, Columbia, Deschutes, Jackson, Lane, Linn, Marion, Multnomah, Polk, Washington and Yamhill.)
- For some benchmarks, data for counties with small populations may have frequent ups and downs because single events will have a large impact on overall rates.
- With 66 slides, this is a very long slide show. *Except for modifying the data*, users may delete or rearrange slides, or use them in other shows based on the needs and interests of their audience.
- Please acknowledge the Oregon Progress Board for any content used from this show.

What is the Oregon Progress Board?

- A state board
- Created by the Legislature in 1989
- Responsible for monitoring the state's 20-year strategic vision, *Oregon Shines*
- Oregon Benchmarks are the measures used to monitor progress.

What are Oregon Benchmarks?

- 91 societal measures of progress towards three *Oregon Shines* goals:
 - 1) Quality jobs for all Oregonians
 - 2) Engaged, caring & safe communities
 - 3) Healthy, sustainable surroundings
- 31 of the 91 benchmarks have county-level data and are shown here for Baker County.

Statutory reference: (ORS 285A.168)

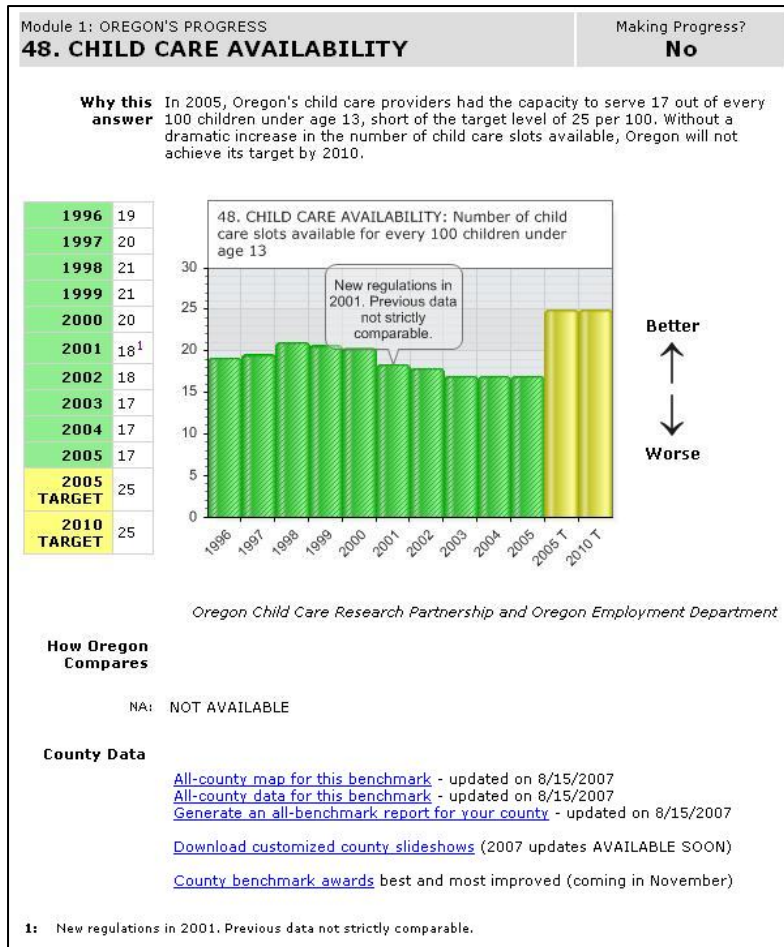

This show is organized by benchmark categories
