

Mid-Valley Economic Indicators—Linn County (Albany MSA)

From March 2017 to March 2018, Linn County’s private sector gained 2,600 jobs and the public sector lost jobs. The education and health services industry led the private-sector employment gains over the year. As the recession gets further away in our rearview mirror and with continued low unemployment, median household income is rising in all four counties and statewide. Next month I will look at poverty rates and see where they are headed.
