

DYSENTERY, AMEBIC

1. REPORTING: Required
2. PLACARDING: None
3. ISOLATION OR QUARANTINE: Limited to sanitary disposal of bowel discharges.
4. SPECIAL MEASURES: Foodhandling restrictions according to Regulation X.

LABORATORY AIDS: Stool specimens may be submitted in standard stool specimen outfits. Be sure to identify the specimen completely and to request examination for amebic dysentery.

REGULATION X. FOOD HANDLING

- A. When a case of cholera, diphtheria, epidemic diarrhea, amebic dysentery, bacillary dysentery, infectious hepatitis, meningococcus meningitis, paratyphoid fever, poliomyelitis, salmonellosis, septic sore throat, scarlet fever, smallpox, tuberculosis, or typhoid fever exists on any farm or dairy producing milk, cream, butter, cheese, or other products likely to be consumed raw, no such food shall be sold or delivered from such farm or dairy except under the following provisions:
1. That such foods for sale are not brought into the house where such case exists.
 2. That all persons coming in contact with such foods, eat, sleep and work wholly outside of such house and not come in contact in any way with such house or its inmates or contents.
 3. That all inmates are properly isolated and separated from all parts of said farm or dairy.
 4. That a permit be issued by the health officer, and such premises be open to his inspection at all times.
- B. No person affected with any communicable disease shall handle food or food products intended for sale. All persons handling or preparing food stuffs or beverages for sale shall have a physical examination by a doctor of medicine whenever desired and requested by the state or local health officers, for the purpose of determining the presence of a communicable disease, particularly, for tuberculosis and the typhoid-paratyphoid-dysentery diseases.

Reproduced from the Oregon State Board of Health *Revised Rules and Regulations for the Control of Communicable Diseases*, December 28, 1950
