

2006
Oregon County and State
Agricultural Estimates

Special Report 790-06, Revised May 2007

2006 Oregon County and State Agricultural Estimates

Oregon Agricultural Information Network (OAIN)
Extension Economic Information Office
Department of Agricultural & Resource Economics
Oregon State University

This report provides a quick overview of Oregon's recent crop and livestock production. The following pages include 2006 preliminary estimates for production and value. In addition, there are revised estimates for 2004 and 2005. Preliminary or first estimates are revised as needed when updated information is received. All of the data reported here were in our database as of April 20, 2007. We collect only farmgate level data. That means that no marketing charges or government payments are included in our price estimates.

Web access is provided for you to review and download the publicly available numbers that we update periodically in our database. The URL for our home page is: <http://oregonstate.edu/oain/>. This publication, as well as earlier versions, can be obtained by clicking on the Ag Summaries (SR 790) button on the right side of our home page.

To see any portion of our database accessible to the public, you may click on the home page button, OAIN Database. No username/password is required; just click on the Next button below the login boxes. You may then bring up preformatted reports on the menu provided or click on User Defined Report/Query to create your own tables. These tables may be displayed on your monitor and downloaded for printing. Or, you may select an EXCEL spreadsheet output for further analysis.

We try hard to protect confidential data from being viewed by agricultural industry members or the general public. That is done by hiding them within our database or by combining them with other commodities in county, regional, or statewide summaries. Our definition of confidentiality is similar to that used by the Oregon Agricultural Statistics Service, USDA: any data that represent fewer than three producers or one producer with 60 percent or more of the identified production are confidential.

The data we provide are obtained from a team of about 70 OSU Extension and research faculty statewide. They are knowledgeable about selected crop and livestock production in the counties that they serve. These numbers reflect their best judgment with respect to commodity production, prices, and usage patterns over time. The data represent overall annual values. It is important to recognize that their choices for aggregating data may shift the gross farm sales ranking of specific commodities and sectors.

Commodities such as some livestock forages are frequently produced, in part, for on-farm use. A single price estimate is made for each county's production regardless of whether it is sold in an open market environment or consumed as an input to the production of other commodities, e.g., beef cattle, dairy cattle, or sheep. The value of production estimates reflects the entire value of the commodity without regard for whether it is sold or consumed on-farm. The percentage of sales for the commodity is also estimated. That percentage is multiplied by the value of production estimate to derive the estimated value of sales. Thus, for commodities that are consumed on-farm in other enterprises, the value of production would be significantly higher than the value of sales.

A special thank you to Robert Clark, Dixon Creek Software, Corvallis, Oregon. Mr. Clark was the programmer who created the software necessary to make the OAIN system operational. We are now able to collect and disseminate data electronically. He continues to provide technical support and upgrades.

Agricultural Commodity Sales Oregon, 2006p

2006p Sales (\$1,000) by Commodity

Field Crops	213,116
Grains	214,769
Grass & Legumes	481,469
Hay & Forage	312,512
Nursery & Greenhouse Crops	816,075
Small Fruit & Berries	126,158
Small Woodlots & Christmas Trees	376,160
Other Specialty Products	117,285
Tree Fruit & Nuts	244,843
Vegetables & Truck Crops	333,395
All Crops	3,235,782
Cattle & Calves	636,081
Dairy Products	325,274
Other Animal Products	93,468
Poultry	109,983
All Livestock	1,164,806
All Crops & Livestock	4,400,588

p=preliminary. Values are in thousands of dollars (10,000 = \$10,000,000).
