Enter or drag the cursors to change the onset date range. January 25, 2020 to April 20, 2020 and Null values

■ Hospitalization Status Unknown
 ■ Hospitalized
 ■ Not Hospitalized

i

When people say we want to “flatten the curve,” this is the curve they are talking about.

We want to slow the number of new cases of COVID-19 so our healthcare system isn't overwhelmed and can provide care to everyone who needs it. Staying home except for essential needs and practicing social distancing are important ways we can flatten the curve.

Notes

†Cases are counted by onset date (the date the person started having symptoms).

COVID-19 data are provisional and subject to change.

Oregonians tested for COVID-19

This chart shows the number of Oregonians tested for COVID-19 and whether ..

Total Tests	Negative	Positive
41,128	39,126	2,002

*We may not have results yet for all specimens tested during this time.

Enter or drag the cursors to change the onset date range. January 27, 2020 to April 21, 2020

■ Negative ■ Positive

†Tests are counted by the first specimen collected date. If that date is not available, onset date is used.

This chart includes test results from the Oregon State Public Health Laboratory as well as commercial and other laboratories. A significant amount of COVID-19 testing for Oregon residents is being done by commercial laboratories such as LabCorp, Quest, and ARUP. Testing numbers will be different than those posted by Oregon State Public Health Laboratory on Oregon Health Authority's website.

COVID-19 data are provisional and subject to change.
