### Oregon's COVID-19 Testing and Outcomes by County

This map shows the number of COVID-19 cases per 100,000 people by county in Oregon.\* The number of cases in a community depends, in part, on the number of people who live there. Looking at the numbers this way helps us compare counties of different sizes more evenly than total case counts alone. Hover over a county in the map below to see the total number of cases, recovered cases, deaths, and number of people with positive and negative tests in t..

Notes

\*Rates shown on this dashboard are calculated using population estimates from the 2019 Annual Population Report from Portland State University's College of Urban & Public Affairs: Population Research Center. For our calculations, we round population numbers to the nearest whole number, resulting in slight variation from the numbers in that report (within +/- 4 persons).

COVID-19 data are provisional and subject to change.
