Masks required statewide for people age 5 and older in:

- All workplaces, indoor public spaces, public and private colleges and universities, and indoor and outdoor markets.
- Outdoor public spaces when physical distancing of at least six feet is not possible.

People with a disability or medical condition may request accommodation if they cannot wear a mask.

OHA does not recommend wearing a plastic face shield alone.

For hospital capacity data: Please see our [daily COVID-19 update](#) and [Hospital Capacity dashboard](#).

For data on testing at the Oregon State Public Health

Laboratory: Please see our [daily COVID-19 update](#).

¹This includes cases confirmed by diagnostic testing and presumptive cases. Presumptive cases are people without a positive diagnostic test who have COVID-19-like symptoms and had close contact with a laboratory confirmed case. Antibody test results are **not** included in our data. County of residence for cases may change as new information becomes available. If changes occur, we will update our counts accordingly.

²For additional details on individuals who have died from COVID-19 in Oregon, please refer to our [press releases](#).

³This includes cases who test negative and are not epi-linked to a confirmed case.

⁴Ever hospitalized, if available, as reported to OPERA. OPERA is the state of Oregon's electronic disease surveillance system for COVID-19. Cases are considered hospitalized if they were ever admitted to the hospital for inpatient care during their COVID-19 illness. Cases who were examined in but not admitted to a hospital may be incorrectly classified as hospitalized until interview and medical record review are complete, leading to fluctuations in the number of hospitalized COVID-19 cases.

Safe + Strong

As we face COVID-19 together, it's clear that we are strongest when we are in community, even from a distance. To help keep our communities safe and healthy, OHA's **Safe + Strong website** provides updates, resources and information in multiple languages. With the right information, we can get through this — together.

School Reopening

Oregon public health officials have developed evidence-based metrics to help school boards and school districts make decisions about how they can safely reopen schools. OHA is working closely with the Oregon Department of Education on their **Ready Schools, Safe Learners** guidance for public and private K-12 schools for the 2020-21 school year.

Face Covering Facts

FACT: Face coverings are an effective way to slow the spread of COVID-19.

Masks of all types help to contain the droplets and aerosols that spread COVID-19. When combined with physical distancing and hand washing, masks are an excellent way to reduce the spread of disease.

For more information visit healthoregon.org/coronavirus or call 211 

Face coverings are an effective way to slow the spread of COVID-19.

Rain and Face Coverings

Letting your face covering get wet may decrease its effectiveness and make it difficult to breathe.

Keep your mask dry by wearing a rain jacket with a hood, carrying an umbrella, or having another means to shield your face covering from the rain. You may also want to carry a spare, just in case.

For more information visit healthoregon.org/coronavirus or call 211 

Letting your face covering get wet may decrease its effectiveness and make it difficult to breathe.

COVID-19 Facts

FACT: COVID-19 can be dangerous for healthy people.

While we know that age and underlying conditions can make COVID-19 infections more severe, there are many people who are younger or in good health for whom a COVID-19 infection is severe or even deadly.

For more information visit healthoregon.org/coronavirus or call 211

Flu Vaccine Facts

FACT: There's no evidence that the flu vaccine causes people to be more susceptible to COVID-19.

The single biggest risk factor is risky behavior like exposure to large groups of people without a mask, indoors, for long periods of time. The risk of contracting COVID is not connected to a flu shot.
