Oregon's Hospital Bed Capacity by Region

These charts show how many hospital beds are available and being used in each Hospital Preparedness Program Region¹ as reported to Oregon's Hospital Capacity Web System (HOSCAP)². Hospitals report staffed and available beds to HOSCAP; based on these numbers, OHA calculates how many beds are being used. Staffed beds are the number of beds that a hospital has staff and equipment to support.

This data does not show the maximum capacity of hospitals. If more patients need to be hospitalized, hospitals could increase the number of beds in a variety of ways including:

- Adding staff and/or equipment
- Repurposing other types of hospital beds
- Postponing or canceling elective procedures

Click on a region in the map to highlight their data in the charts.

Occupied and Available staffed adult ICU beds by region

Occupied and Available staffed non-ICU adult hospital beds³ by region

Notes

¹ Regions 4 and 8 exist in southern Washington state and are not counted in Oregon tabulations.

² Every hospital in Oregon is asked to submit data twice daily to Oregon's Hospital Capacity Web System (HOSCAP). Data are based on the most recent report from the hospitals.

³ Non-ICU adult hospital beds includes "Medical/Surgical" and "Other" beds as reported in HOSCAP.

Data are provisional and subject to change.

Oregon's Hospitalization Trends by Severity

This chart shows daily COVID-19 hospitalizations and whether patients were in the ICU or on ventilators, as reported to Oregon's Hospital Capacity Web System (HOSCAP)¹. It initially displays only those who tested positive, but you can view all suspected or confirmed patients² using the dropdown menu below. Click on a legend item to highlight it in the chart (ctrl+click to select multiple items).

Notes

¹ Every hospital in Oregon is asked to submit data twice daily to Oregon's Hospital Capacity Web System (HOSCAP). Data are based on the most recent report from the hospitals. The above hospitalization data is different than other reports on the OHA website, as these data are from HOSCAP and not from OPERA (Oregon's electronic disease surveillance system for COVID-19). HOSCAP reflects the current day's number of hospitalized patients who have confirmed or suspected COVID-19 as reported by hospital staff. OPERA relies on public health interviews with confirmed and presumptive COVID-19 patients to determine whether they were hospitalized during the course of their illness, which results in reporting delays.

² On May 4, 2020, the definition of "suspected or confirmed" was clarified to mean only those patients who were hospitalized specifically for COVID-19 or COVID-19-like illness and that it should not include patients being tested for COVID-19 that were otherwise not suspected to have COVID-19. Counts prior to this date may overestimate the number of suspected COVID-19 hospitalizations in these data.

Data are provisional and subject to change.

Oregon's Hospitalization Trends by Region

This chart shows COVID-19 hospitalization trends by Hospital Preparedness Program Region¹ as reported to Oregon's Hospital Capacity Web System (HOSCAP)². Use the dropdown menu to choose the type of hospitalization³ and/or click a region on the map to filter the chart (ctrl+click to select multiple regions).

Select patient type:
COVID-positive patients

COVID-positive patients in Oregon hospitals

Notes

¹ Region refers to the location of the hospital, not the residence of the patient. Regions 4 and 8 exist in southern Washington state and are not counted in Oregon tabulations.

² Every hospital in Oregon is asked to submit data twice daily to Oregon's Hospital Capacity Web System (HOSCAP). Data are based on the most recent report from the hospitals. These data may conflict with hospitalization status in Opera due to case reporting and investigation lags and temporary discrepancies in case classification.

³ On May 4, 2020, the definition of "suspected or confirmed" was clarified to mean only those patients who were hospitalized specifically for COVID-19 or COVID-19-like illness and that it should not include patients being tested for COVID-19 that were otherwise not suspected to have COVID-19. Counts prior to this date may overestimate the number of suspected COVID-19 hospitalizations in these data.

Data are provisional and subject to change.

Oregon PPE by Hospital

Each week, hospitals report how much PPE they have to Oregon's Hospital Capacity Web System (HOSCAP)¹:

- *Amount of PPE on hand* is the number of PPE items the hospital currently has (for example, how many gloves).
- *Burn rate* is the average number of items used per day over the last week.
- *Days on hand* are the estimated number of days that the hospital's current PPE would last if they did not receive more.

Hospital/Health System	Face Shields			Gloves			Gowns			N95 Respirators			Surgical Masks

Notes

¹ Oregon Health Authority asks every hospital in Oregon to submit PPE data to Oregon's Hospital Capacity System (HOSCAP) each Monday by noon. Data are based on the most recent report from hospitals.

Additional Information:

- OHA recently changed the way we collect PPE information in HOSCAP, so you may see some discrepancies in the data. As we continue to refine the process, we will improve data quality.
- Some health systems report combined PPE for all of their hospitals. These combined reports are marked "(HEALTH SYSTEM)".
- Veterans Affairs hospitals receive their PPE from the federal government and do not report PPE to HOSCAP.
- OHA does not require behavioral health hospitals to report PPE to HOSCAP because they are not expected to treat COVID-19 patients.

Data are provisional and subject to change.
