Notes:

Oregon ALERT Immunization Information System (IIS) is a statewide, lifespan immunization registry.

COVID-19 vaccination providers must document vaccine administration in their medical record systems within 24 hours of administration, and use their best efforts to report administration data to ALERT IIS as soon as practicable and no later than 72 hours after administration.

**Doses administered counts the number of vaccines administered; people vaccinated counts the number of unique individuals who received vaccine; currently, only first doses have been administered and so the number should match, except for an anticipated <1% of invalid doses due to unresolved duplicate vaccination reports or data entry errors; as second doses are released and individuals complete the series, the total doses administered and people vaccinated will, expectedly, diverge.

†Race categories are not mutually exclusive. People with two or more races are counted in each of their racial groups.

American Indian/Alaska Native may include data reported from the federally recognized Tribes of Oregon.

For ethnicity, a person is counted only once as either Hispanic, not Hispanic, or unknown.
