Oregon's COVID-19 Testing and Outcomes by County

This map shows the number of COVID-19 cases per 100,000 people by county in Oregon.* The number of cases in a community depends, in part, on the number of people who live there. Looking at the numbers this way helps us compare counties of different sizes more evenly than total case counts alone. Hover over a county in the map below to see the county's total number of cases, deaths, and positive and negative test results reported electronically. The ..

Notes

*Rates shown on this dashboard are calculated using population estimates from the 2019 Annual Population Report from Portland State University's College of Urban & Public Affairs: Population Research Center. For our calculations, we round population numbers to the nearest whole number, resulting in slight variation from the numbers in that report (within +/- 4 persons).

Oregon's Trends in COVID-19 Testing and Test Positivity†

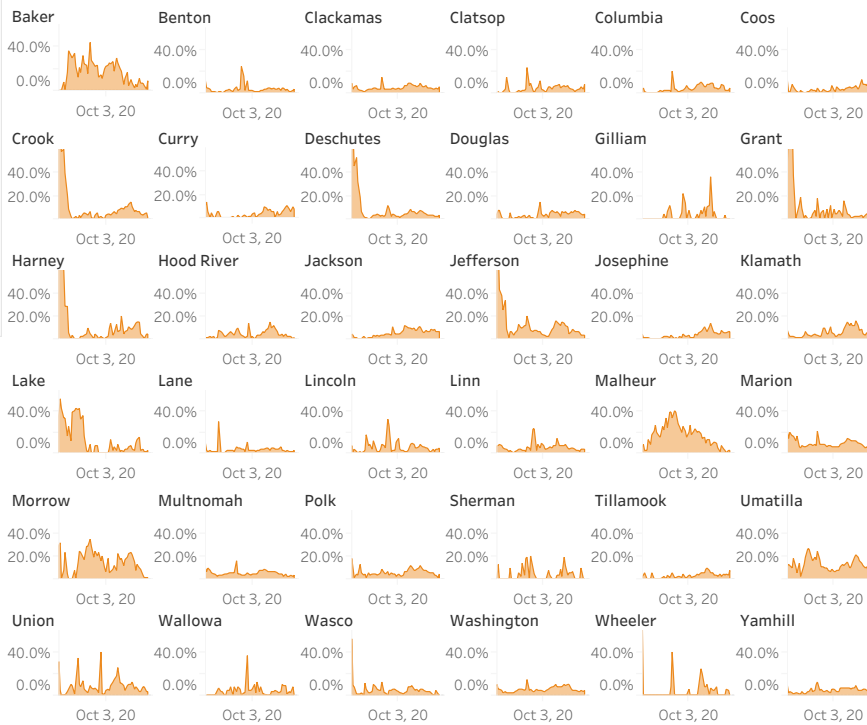

This map shows the percent of COVID-19 tests that were positive during the past week for each county in Oregon. Hover over a county in the map below to see the total number of COVID-19 tests reported electronically and the percent of those tests that were positive during the past week. The county graphs to the right show the weekly trends in the percent of COVID-19 tests that were po..

Percent Positivity Total Tests

Counties without any reported testing in the past week will not appear on the map.

Weekly trends in percent of COVID-19 tests that are positive. Data will load slowly, please be patient. Hover over the graph to learn more about each week.

† On this dashboard, all tests and test results are assigned to a calendar week based on the date the electronic laboratory report (ELR) or other electronic test report was created.

* Counties with a population of 80,000 or less are displayed with a maximum axis of 2,000 tests per week, counties with a population of >80,000 to 200,000 are displayed with a maximum axis of 8,000 tests per week, counties with a population of 200,000 to 500,000 are displayed with a maximum axis of 15,000 tests per week, and counties with a population greater than 500,000 are displayed with a maximum axis of 30,000 tests per week.
