

# Weekly deaths in Oregon

Center for Health Statistics

The data presented here represent provisional weekly mortality data for Oregon through April 11, 2021, as well as three-year and five-year averages.

Oregon’s weekly deaths have exceeded historical averages since March 2020, and have exceeded the statistically significant thresholds for excess mortality generated by the National Center for Health Statistics for 38 weeks since that time. During the same period, deaths nationwide have exceeded the NCHS thresholds to a greater degree than in Oregon.\* Deaths attributed to COVID-19 accounted for 40% of the observed excess deaths over the five-year historical average for the week ending April 11. Since March 2020, deaths attributed to COVID-19 account for 51% of the observed excess over the five-year historical average for that period.

## Weekly deaths in Oregon

UPDATED 4/20/2021

### NOTES

1. Data from 2020-2021, including COVID-19 deaths, are provisional and subject to change.
2. Current-year data lag about one week behind due to the time required for death certificates to be processed.
3. On 1/13/2021, the starting and ending dates for weekly historical averages were adjusted to better align with current data. This will result in small changes in historical averages from previously published versions of this graphic.

# Weekly deaths in Oregon counties

Center for Health Statistics

The data presented here represent provisional weekly mortality data for Oregon counties through April 11, 2021, as well as three-year and five-year averages.

Click a county from the map or list below to see data for that county. Use CTRL+click or click-and-drag to select more than one county.

Oregon's weekly deaths have exceeded historical averages since March 2020, and have exceeded the statistically significant thresholds for excess mortality generated by the National Center for Health Statistics for 38 weeks since that time. During the same period, deaths nationwide have exceeded the NCHS thresholds to a greater degree than in Oregon.\*

UPDATED 4/20/2021

### NOTES

1. Data from 2020-2021 are provisional and subject to change.
2. Current-year data lag about one week behind due to the time required for death certificates to be processed.

The data presented here represent provisional weekly mortality data for Oregon through April 11, 2021, as well as three-year and five-year averages.

Higher than average deaths in homes, home hospice, and hospitals account for much of the recent differences between overall mortality and historical averages. Oregon has exceeded the statistically significant thresholds for excess mortality generated by the National Center for Health Statistics for 38 weeks since March 2020, but deaths nationwide have exceeded the NCHS thresholds to a greater degree than in Oregon.\*

### NOTES

1. Data from 2020-2021, including COVID-19 deaths, are provisional and subject to change.
2. Current-year data lag about one week behind due to the time required for death certificates to be processed.
3. On 1/13/2021, the starting and ending dates for weekly historical averages were adjusted to better align with current data. This will result in small changes in historical averages from previously published versions of this table.
