

Oregon's COVID-19 Risk Levels

Hover over a county to see more information

Statewide Metrics

05/30/2021 - 06/12/2021

89.34 cases per 100k residents

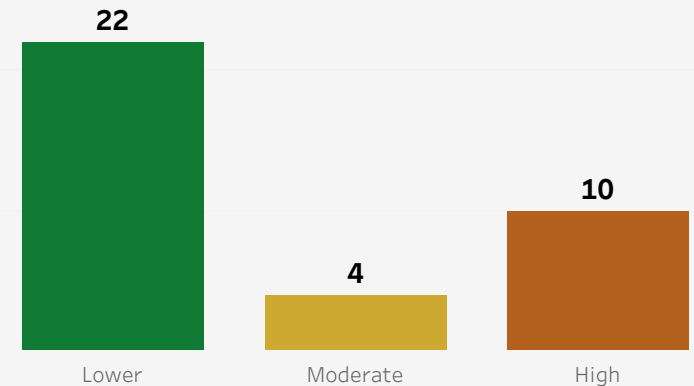

4.1% test positivity

Risk Level

- High
- Moderate
- Lower

Hover over one of the bars below to highlight the counties in that risk level

Oregon Counties by COVID-19 Risk Level

*These counties qualify for Lower Risk as they have had 65% of county residents 16 and older receive one dose of a COVID-19 Vaccine and submitted documentation to OHA describing how they will close vaccine equity gaps. This is based on ALERT IIS data as well as federal doses from Veterans Affairs, Department of Defense and Federal Bureau of Prisons. Federal doses from these entities are not shown above but are counted toward the county risk metric movement.

†These counties qualified for Extreme Risk but were placed in the High Risk as the statewide Hospital Beds Metric was not met.

‡Lane and Clackamas Counties reached their 65% vaccination goal with the inclusion of federal vaccine doses.

Oregon Health Authority (OHA) is monitoring indicators of COVID-19 disease spread in Oregon and our public health response. The data shown on these additional tabs are separate from Oregon's Risk and Protection Framework. These public health indicators help OHA understand the health impact of COVID-19 in communities across the state and make recommendations as appropriate.

This dashboard will be updated weekly.

COVID-19 Disease Spread

[Public Health Response](#)

Oregon's COVID-19 Disease Spread

We want to be sure the spread of COVID-19 Oregon remains low enough to keep Oregonians safe. We track how many people visit the emergency department for COVID-like illness, how many people with COVID-19 are admitted to the hospital, and the number of congregate living facilities with active outbreaks. These are early warning indicators of severe disease spread. Hover over the charts to l..

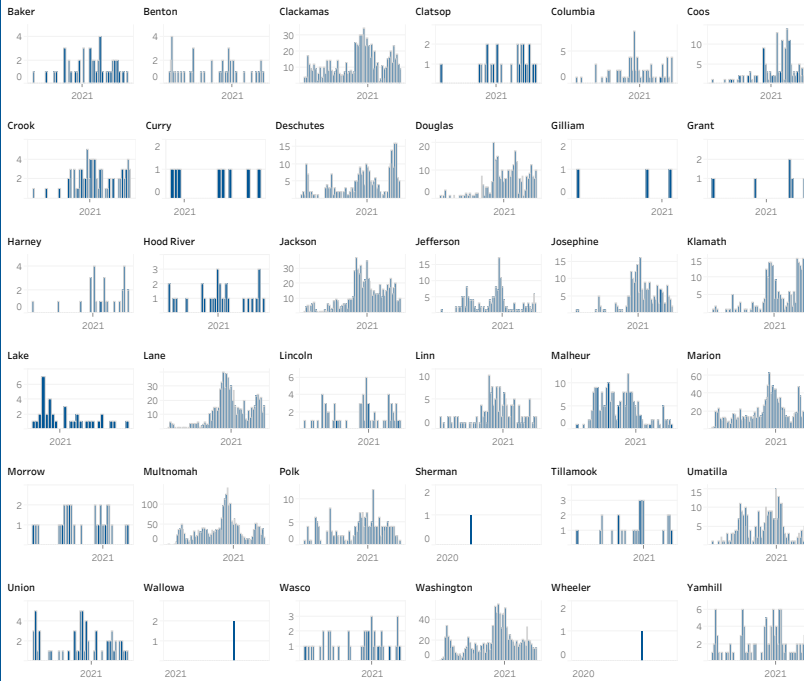

Emergency department visits for COVID-19-like illness continue to decline since the most recent peak in April 2021

This chart shows the percent of statewide emergency department visits for COVID-19-like illness (CLI) each week. Lower is better on this indicator

New hospital admissions of COVID-19 cases continue to decline since the most recent peak in April 2021

These charts show the number of COVID-19 case hospital admissions each week. The orange line represents a 2-week moving average. Lower is better on this indicator

Number of congregate living facilities with active outbreaks

OHA is publishing data on cases and deaths in care facilities, senior living communities, and congregate living settings that have three or more confirmed COVID-19 cases or one or more deaths in the Weekly Outbreak Report, published on Wednesdays.

Public Health Response

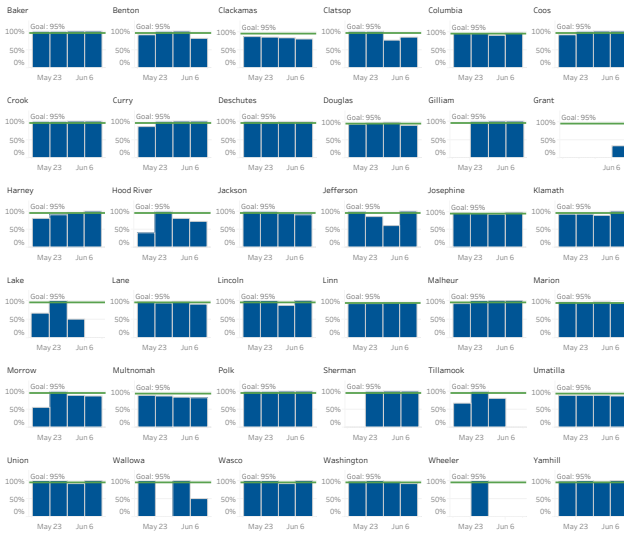

Oregon's Public Health Response

This page shows how well public and tribal health authorities are following up with Oregonians after they are diagnosed with COVID-19. Following up with cases is important because it lets Oregonians know when they need to self-isolate or quarantine to help stop the spread of disease. This is how we identify close contacts who might have been exposed to COVID-19. Hover over the charts to learn more.

Timely public health follow-up has improved as case counts have decreased

Public health wants to quickly initiate active monitoring and contact tracing of COVID-19 cases. These charts show the percentage of new COVID-19 cases that public health initiated follow up with within 24 hours of identifying the new case.

Higher is better on this indicator

The percentage of COVID-19 cases traced to a known source remains low, indicating continued community spread

The charts below show the percentage of new cases traced to a known source of COVID-19. As public health is able to trace more cases to known sources, fewer cases are categorized as sporadic which indicates lower community spread.

Higher is better on this indicator

Notes
 † Week Case was Reported to Public Health is the date when a COVID-19 case was identified as a confirmed or presumptive case by public health.
 COVID-19 data are provisional and subject to change.
