Notes

* AI/AN = American Indian or Alaska Native; Pacific Is. = Native Hawaiian or Other Pacific Islander.

† During the course of the case investigation, people are asked to self-report their race, ethnicity, tribal affiliation, country of origin, or ancestry. Many people who consider themselves Hispanic or Latinx, which is an ethnicity, will use one of these or an equivalent term to describe their race, which then gets categorized as "Other" race. Currently, 88.1% of case-patients shown as "Other" race above reported that they are Hispanic or Latinx.

Rates shown on this dashboard are calculated using population estimates from the 2020 Annual Population Report from Portland State University's College of Urban & Public Affairs Population Research Center and 2019 housing and demographic data from the U.S. Census Bureau's American Community Survey (ACS).

COVID-19 data are provisional and subject to change.

Length of Hospital Stay

This chart shows the number of COVID-19 cases in Oregon who were ever hospitalized for their illness and the length of their hospital stays.

Note:
2632 hospitalized COVID-19 patients have an unknown length of hospital stay. This is because information on their exact date of hospital admission or discharge is still pending.

Hospitalizations of Oregon's COVID-19 Cases

This chart shows the number of COVID-19 cases in Oregon who were ever hospitalized for their illness and whether they received care from an Intensive Care Unit (ICU).

Notes

COVID-19 data are provisional and subject to change.

COVID-19 Quick Facts

Median length of stay (in days): **6**

When we look at the length of stay for all hospitalized cases in Oregon, the median is the length of stay that falls in the middle.

2,149 out of **12,064**

Oregonians hospitalized with COVID-19 received care from an ICU.

COVID-19 Deaths In Oregon

Length of Illness

Among those who have died with COVID-19, OHA defines length of illness as the number of days from onset date to the date of death. Onset date is the date a person started having symptoms. If symptom start date is not reported their onset date is calculated as two days before the specimen was collected for testing. This means that the length of illness presented here is a conservative estimate of actual length of illness.

The Median Length of Illness for those who have lost their lives is **15** days.

Deaths by Week (Hospitalization Status and Age Group)

The graph below depicts the number of Oregonians who have died with COVID-19 by week of death and either their age group or whether they were hospitalized during the course of their illness. Use the toggle to switch between age group and hospitalization status.

Deaths by Age Group Deaths by Hospitalization Status

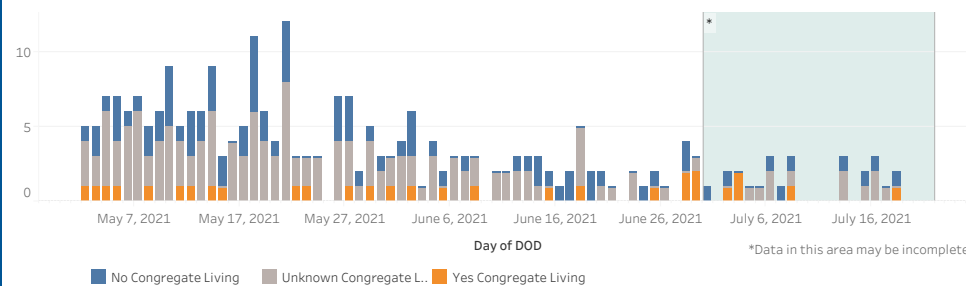

Deaths by Day and Congregate Living Status

*Data in this area may be incomplete

The graph below displays Oregonians who have died with COVID-19 by the date of death and congregate living status. Congregate living situations include, but are not limited to, long-term care facilities, group homes, prisons, and shelters. The date of death represents the exact date on which a person with COVID-19 died and is different from the day a death is reported to public health. By default, the graph is set to display the last three m.
