### Oregon's COVID-19 Overview

### Oregon's COVID-19 Testing and Outcomes by County

This map shows the number of COVID-19 cases per 100,000 people by county in Oregon. The number of cases in a community depends, in part, on the number of people who live there. Looking at the numbers this way helps us compare counties of different sizes more evenly than total case counts alone. Hover over a county in the map below to see the county's total number of cases, deaths, and positive and negative test results reported electronically. The table summarizes this information as rates and percentages for all counties.

Select a county on the map to highlight the table and filter the bar chart below.

Cases per 100,000

1.0 51,663.3

### Cases by Date Reported to Public Health - All

The graph below shows the number of confirmed and presumptive COVID-19 cases by the date the case was first reported to Public Health in the current and previous four weeks. Please note that case counts can shift by county of residence or date as case investigators gather more information.

	Case Count per 100,000	Deaths (%)	Positive Tests (%)	Test Count per 100,000
All	5,123.9	1%	6%	133,302.9
Umatilla	11,463.3	1%	12%	109,249.6
Malheur	11,412.6	2%	15%	110,509.3
Jefferson	10,342.3	2%	9%	107,703.8
Morrow	9,536.1	1%	14%	79,258.3
Grant	7,682.6	1%	6%	113,987.0
Klamath	7,258.2	2%	9%	93,864.1

Tillamook	2,823.2	1%	4%	72,631.0

Notes:  
 Values shown on this dashboard are calculated using population estimates from the 2020 Annual Population Report from Portland State University's College of Urban & Public Affairs, Population Research Center. For our calculations, we round population numbers to the nearest whole number, resulting in slight variation from the numbers in that report (within +/- 4 persons).  
 COVID-19 data are provisional and subject to change.
