Notes: Data are provisional and subject to change.

* Total cases include both presumptive and confirmed cases. Presumptive cases are people without a positive diagnostic test who have COVID-19-like symptoms and had close contact with a laboratory confirmed case.

** On May 21st the WHO released new names for the Variants using the Greek alphabet.

† The Delta variant number aggregates the B.1.617.2, AY.1, AY.2, and AY.3 pangolin lineages. The disaggregation of these lineages can be seen on the Variant Dashboard. There is a time lag of approximately two weeks between when a sample is collected, sequenced and then reported by OHSU. This chart reflects that time lag. On July 20th, 2022 the CDC removed the P.1 (Delta) variant as a variant of interest. OHA removed that data from the dashboard.

‡ The cumulative cases by county list does not include cases whose county of residence is unknown.

Oregon HOSCAP Update

Notes

Data are provisional and subject to change.

Total COVID-19 patients include any patient who has either suspected COVID-19 or a positive COVID-19 test.

*Every hospital in Oregon is asked to submit data twice daily to Oregon's Hospital Capacity Web System (HOSCAP). Data are based on the most recent report from the hospitals, available as of 9:00am. Hospital staff are asked to enter bed capacity information, by type, as well as the number of patients with suspected or confirmed COVID-19 illness who are currently hospitalized at the time of data entry. These data may conflict with hospitalization status in Orpheus due to case reporting and investigation lags and temporary discrepancies in case classification.
