Notes: Data are provisional and subject to change.

*Total cases include both presumptive and confirmed cases. Presumptive cases are people without a positive diagnostic test who have COVID-19-like symptoms and had close contact with a laboratory confirmed case.

** On September 23, 2021 the CDC added a classification of Variants Being Monitored. This classification includes variants previously designated Variants of Interest (VOIs) or Variants of Concern (VOCs) that are no longer detected or are circulating at very low levels in the United States, and do not pose a significant or imminent risk to public health in the United States.

† The Delta variant number aggregates the pangolin lineages B.1.617.2 and AY-3-32 as Delta, and AY-1-2 as Delta Plus. The disaggregation of these lineages can be seen on the Variant Dashboard.

There is a time-lag of approximately two weeks between when a sample is collected, sequenced and then reported by GISAID. This chart reflects that time-lag.

Notes

Data are provisional and subject to change.

*"Total COVID-19 patients" include any patient who has either suspected COVID-19 or a positive COVID-19 test.

*Every hospital in Oregon is asked to submit data twice daily to Oregon's Hospital Capacity Web System (HOSCAP). Data are based on the most recent report from the hospitals, available as of 9:00am. Hospital staff are asked to enter bed capacity information, by type, as well as the number of patients with suspected or confirmed COVID-19 illness who are currently hospitalized at the time of data entry. These data may conflict with hospitalization status in Orpheus due to case reporting and investigation lags and temporary discrepancies in case classification.
