VACCINATION — Statewide

| | |
|---|-------|
| Vaccination coverage, statewide people ages 18+ | |
| One dose | 84.1% |
| Boosted | 46.3% |

Updated weekly | Source: ALERT IIS

TESTING — Statewide | SEQUENCING — Statewide

| | |
|-----------------|-------|
| Test positivity | 16.4% |
| Tests reported | 9,914 |

Source: ELR and OCRP

Due to a processing error, electronic laboratory report (ELR) counts for June 2, 2022 are inaccurate and will be excluded from data visualizations. Test counts and percent positivity for June 2 will not be available on this dashboard. Case counts for June 2, 2022 are accurate. The root cause of the issue has been addressed; OHA does not anticipate this error occurring again.

| | |
|---------------------------------|--------|
| Total Variants of Concern | |
| Omicron (B.1.1.529, BA.1, BA.3) | 12,163 |
| Omicron (BA.2) | 2,831 |
| Omicron (BA.2.12.1) | 663 |
| Omicron (BA.4) | 42 |
| Omicron (BA.5) | 32 |

Updated weekly | Source: GISAID

Data are provisional and subject to change.

Opera is Oregon's COVID-19 disease surveillance system. Total cases include both presumptive and confirmed cases. Presumptive cases are people without a positive diagnostic test who have COVID-19-like symptoms and had close contact with a laboratory confirmed case.

Oregon's Hospital Capacity Web System (HOSCAP) data are from the most recent report from the hospitals, as of 9:00am. Every hospital in Oregon is asked to submit data twice daily.

Oregon ESSENCE, Electronic Surveillance System for the Early Notification of Community-based Epidemics, allows for public health to monitor what is happening in emergency departments across the state. Oregon ESSENCE receives daily reports of emergency department visits from all 60 non-federal hospitals in Oregon.

Vaccination data are from the Oregon ALERT Immunization Information System (IIS). COVID-19 vaccination providers must report administration data to ALERT IIS no later than 72 hours after administration.

Testing data are from electronic laboratory reports (ELR) and the Oregon COVID-19 Reporting Portal (OCR). Tests are counted by the date received by public health. Counts reflect individual tests and not individual persons tested. Non-antibody and non-info only COVID results are deduplicated based on medical record number (MRN), accession number, facility and result daily.

Variant data are from the open-source sequencing data platform GISAID and are updated weekly on Wednesdays. There is a lag of approximately two weeks between when a sample is collected, sequenced and then reported by GISAID; this chart reflects that time-lag.

Due to an electronic laboratory report (ELR) processing issue, the majority of ELRs received on June 25 were not processed and counted until Sunday June 26. Test counts and percent positivity are lower than anticipated for June 26; percent positivity for the week of June 19 is lower than anticipated. Case counts are lower than anticipated for June 25 and higher than anticipated for June 26.

Oregon's COVID-19 Update 6/27/2022

| | New COVID-19 cases | | COVID-19 case rates, totals | | Deaths with COVID-19 | | COVID-19 tests | | | |
