About *Memento Morbi*

This monthly report contains an early source of infectious disease surveillance data for Oregon. These data are important for monitoring early trends of notifiable infectious diseases and for targeting prevention and control efforts. The purpose of this document is to summarize important information data users should know about the report to facilitate proper analysis and interpretation.

1. This report comprises compilations of data received by offices of the Oregon State Public Health Division (OSPHD).
2. The diseases reportable by law may increase or decrease over time.
3. The reporting status of diseases included may be determined by state law or be acquired through voluntary submissions.
4. Data are provisional and subject to change upon the completion of ongoing disease investigations.
5. *Memento Morbi* is prepared in the two weeks following the end of the calendar month; delayed case reports would be included in later issues. The same would apply to subsequent differences resulting from duplicates or erroneous data entries in individual reports.
6. Temporal distributions are generally based upon the date of onset or if unavailable, the next available date for epidemiologic purposes, including date of specimen collection, date reported to the local health department, or date reported to OSPHD. Exceptions include tuberculosis cases by date of report to CDC and HIV/AIDS reported by date of diagnosis, STDs by local health report date. Using these various dates were replaced with MMWR event date in 2014. This date is defined by CDC and in general is a close approximation to the previously mentioned dates.
7. Starting in August of 2012, the STD data are now presented in more detail on the website

<http://public.health.oregon.gov/DISEASESCONDITIONS/COMMUNICABLEDISEASE/DISEASESURVEILLANCEDATA/STD/Pages/index.aspx#countyquarter>

and the HIV data at

<http://public.health.oregon.gov/DiseasesConditions/CommunicableDisease/DiseaseSurveillanceData/HIVData/Pages/epiprofile.aspx>

8. Data pertaining to race and ethnicity may be incomplete and may have been collected differently for the various notifiable diseases and across time.

In Summary

These data are subject to change, reflecting recent entry of information received from reporting sources.
